

ANDREA GOBBI

Inside the music and audio

To tell you a little bit about myself, I always worked in my personal studio where my soundtracks are composed and my sound libraries are created.

I can work in several recording studios. I am a person who is updating a lot about DAWs and hardwares. I always like to study new technologies and new sounds worlds, although my experience is to work INtheBOX and analog studios. I'm available to travel for work and city transfers. About my carrer of Boom Operator and Sound Mixer I have worked in Italy with SOUND FISH (Milan) and UK as a freelance for many different brands and company like SKY ITALY, BBC, documentary, films, featured films, TV programs, corporates. My skills have grown since 2020 and I started doing the Foley artist in my studio full of props!

Last but not least, I truly appreciate working within a creative team.
